Terms and Conditions of Sale

Terms

Terms are 1% 20, net 30 days. Late penalties will be charged on all past due accounts. Major credit cards are accepted.

Prices and Delivery

Our price list is for delivered pricing, F.O.B. origin. Freight is prepaid and allowed for normal ground transportation within the 48 contiguous states. Airfreight, will calls and special delivery will be quoted and invoiced separately. Prices do not include installation and sales tax. Nevers Industries, Inc. is not responsible for freight delays due to strikes, lockouts, weather, or other causes beyond our control.

Order Acknowledgement

All orders are subject to final acceptance by Nevers Industries, Inc. Receipt of our acknowledgement indicates acceptance of your order subject to the terms and conditions set forth in Our Acknowledgement. If pricing on the purchase order is different than the acknowledged pricing, the acknowledgement will take precedent over the purchase order. All orders are subject to credit approval.

Nevers Industries, Inc. attempts to clarify all orders. But in the event that the model number and the description differ the model number will be the determining factor. All orders will be filled as shown on Our Acknowledgement.

Change Orders

Nevers Industries, Inc. will make every attempt to honor any reasonable change request to standard product provided that the request is received prior to start of production. Change orders will be accepted only if the request is made in writing and received in time to make the change. Nevers Industries, Inc. reserves the right to increase our acknowledged price if necessary to make the requested changes.

Cancellations

Orders may be cancelled only with written consent from Nevers Industries, Inc. If cancellation is approved by Nevers Industries, Inc. orders will be subject to a cancellation fee. Non-standard items, custom orders, special finishes or materials cannot be cancelled after acceptance by our corporate office. Once production has begun neither standard orders nor custom orders are subject to cancellation.

Storage

All merchandise will ship upon completion of production. If customer is unable to take delivery of merchandise when ready for shipment. Nevers Industries, Inc. may transfer the merchandise to storage. All cost for storage and freight will be at customers' expense. Transfer to storage will be considered delivery for all purposes including invoicing and payment. Customer will bear the risk of loss or damage during storage.

Shipment Claims

Legal title of merchandise passes to the buyer upon acceptance by the carrier. The buyer must inspect all cartons. In the event of freight damage, the buyer must make a notation on the freight bill; immediately notify the carrier for an inspection and file a freight claim. Keep all packaging materials for inspection (do not destroy). If concealed damage is discovered, the carrier must be notified within 15 days. The buyer has the sole obligation of seeking recourse against the carrier.

Returns

All Nevers Industries, Inc. products are made to order. Therefore, merchandise may not be returned without specific consent from Nevers Customer Service Department. Unauthorized returns will be refused by the receiving department.

Specifications

Nevers Industries, Inc. reserves the right to change prices, specifications, fabrics, dimensions and finishes at any time without prior notice. This right to change also applies to discontinuing models at any time, catalog contents and price lists contents.

Limited Warranty

Nevers Industries, Inc. warrants its products to be free from defects in material and workmanship under normal and reasonable use and service for a period of ten years from the date of shipment to customer. The decision of defects in workmanship or materials or the decision of misuse or abuse remains with Nevers Industries, Inc. No warranties other than those contained herein will be implied and Nevers Industries, Inc. does not authorize any person to create any warranties other than those contained herein.

Wood Veneers

Eventi products are crafted primarily of Oak, Walnut, Mahogany, Ash, Cherry, Maple, Sycamore, Pear and Bamboo. Veneer panels are 3-ply balanced construction are laid up with plain sliced face veneers and are balanced on back to minimize warping and to balance natural stresses. Cores are either 45# particleboard, or 48# medium density fiberboard, per ANSI standards 208.1 or 208.2. Face veneers meet or exceed AWI custom standards are “A” grade. All “A” face veneers are balanced matched and either book or slip matched and are laid up to Nevers’ custom specifications.

Wood Finishes

Standard wood finishing process is a multi-step procedure involving dyes, stains, toners, sealers, lacquer. For added protection and durability, the final topcoat on all horizontal surfaces is a catalyzed-blended, lacquer/varnish finish. All finishing processes have been formulated to provide maximum durability and clarity, and to enhance the natural characteristics of each particular wood species. Standard finish is open pore. Semi-filled and filled finishes require an up charge and may extend the lead-time. Please contact Customer Service for pricing and availability on these and other wood species.

Note: Color variation will occur in the grain of all wood species. This is an inherent characteristic caused by the annual growth rings found in all hardwoods and by the manner in which the boards and veneers are cut across these growth rings. In some species, this color variation is very subtle. In other species this color variation is obvious and at times radical.

The process of finishing hardwood veneers determines whether these variations are enhanced or subdued. Natural finishes will show color variations in the grain and enhance the beauty of the wood to its fullest extent. Other stains, toners, and finishes tend to blend these variations, dependent upon the depth of color and the particular method of application.

Custom Wood Colors and Finishes

Nevers offers the capability of matching your custom stains or finishes. Virtually any wood finish or color sample can be matched to your specifications. A finish or stain sample is required before the process of matching approval can begin. The upcharge for custom finishes varies with the type of finish and also with the quantity ordered. Please contact Customer Service for pricing and availability. **For custom stain/color match – any order under \$2,425 net there is a net up charge. Please call Customer Service for details.**

Table Edge Details

Eventi Articulating, Modular and Executive Conference Tables

Eventi Dué Conference, Small Meeting Room and Mobile Tables

General Specifications

ColorCoat

Standard ColorCoat is a painted wood core of 48# medium density fiberboard, per ANSI standards 208.1 or 208.2.

Special colors are available and may require an up charge and extend lead-time. Please contact Customer Service for pricing and availability.

Optional Stone Tops

Credenzas and table stone tops are 2 cm thick and are Dupont Zodiaq, a 93% Quartz Surface. Food preparation safe.

Special stone colors are available and may require an up charge and extend lead-time. Please contact Customer Service for pricing and availability.

Optional Glass Tops

Credenza and table glass tops are 1cm (3/8") thick and are etched on the back for a semi-transparent appearance.

Furniture Care, Cleaning and Maintenance Instructions

WOOD SURFACES

Your Nevers' furniture requires only minimal care to ensure years of lasting beauty and performance.

Any spilled liquids should be wiped up immediately with a dry soft cloth.

On a weekly basis dust the wood surface, then clean with a damp, soft cloth, wiping in the direction of the wood grain. Surface should then be dried with a dry, soft cloth.

On a semi-annual basis, after the weekly cleaning, clean the wood surfaces with a quality wood cleaner such as Guardsman Wood Cleaner. Products containing oil, ammonia or silicon should not be used. For specific questions about Furniture Care, Cleaning and Maintenance, contact Nevers customer service at **800-242-2443**.

Power/Voice/Data (PVD) Channel Features and Benefits

INTRODUCTION

Nevers Power/Voice/Data (PVD) system is a unique power and communications channel design that eliminates all the time consuming ordering and specifying information that is required by other manufacturers. The Nevers PVD Channel provides the ultimate in simplicity and flexibility for the specifier, the electrician and the AV installer.

What makes the Nevers' PVD system unique in its simplicity and flexibility for the specifier is **there is no need to provide details for each connection when placing your table order**. This avoids the delays in product shipments that some manufacturers experience and also avoids the need for you to call the voice/data suppliers for size specifications that other manufacturers require of you. The PVD Channel system is the finest in the industry today and is available only from Nevers.

FEATURES & BENEFITS

PVD Channel

The Nevers PVD Channel is a flat bottom V design that accommodates electrical power connections on one side and voice/data connections on the other side. The metal channel has punched cut outs into which Nevers pre-installs the required components. Because this is a channel system, there is ample room for storage of power cords within the channel. This eliminates the interference of cords laying across the table top that is associated with flush mount or pop up connectors.

Electrical Power

On the electrical power side of the PVD Channel, Nevers pre-installs power blocks into each cut out. All that is required on installation is for the electrician to snap the supplied duplexes into the power blocks and to plug the supplied jumper cables together. Connect the power in-feed and the electrical installation is done.

Voice/Data

On the Voice/Data side of the PVD Channel, Nevers pre-installs Decora-type face plates. Each face plate contains 2 openings for acceptance of voice/data jack adapters. For each opening we send an adapter kit that contains adapters in three different sizes. All that is required on installation is for the AV installer to select the proper size adapter and snap it into the face plate opening. It is now ready to accept the voice/data jacks of the selected supplier.

If an opening is not used, the kit also contains snap-in blank covers for a clean, finished look. For high density sub D connections (an example of this is LCD projectors) the kit also contains 1 adapter per table. This installs by simply removing the installed face plate and snapping in the high density sub D adapter face plate.

PVD Channel Installation

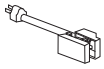

The Nevers PVD Channel attaches to the metal frame that connects the table bases together. This allows all electrical, voice/data and audio visual connections to be completed before the table top is installed. The installers are able to complete their work with free and clear access to the PVD Channel and all components without having to work under the table.

Custom PVD Channels & Installations

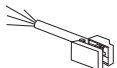

Due to the growing number of installations for sophisticated video presentation rooms and video conferencing rooms, Nevers has become very adept at working with AV consultants and with Pro-AV Dealers in developing custom solutions for power/voice/data and for audio visual connections. You can be assured that when specifying & ordering Nevers' products, we will work closely with all project team members to make sure our mutual customers receive the best in customer service and that all of their requirements will be met. If you do not have a Pro-Av Dealer with whom you are currently working, Nevers can supply you with the names of our Pro-AV Dealer partners.

Power In-Feed

Power in-feed brings electricity from the building's power source through the table base and plugs into either end of the PVD channel. Nevers offers two types of power in-feed.

Single Circuit Plug In - Activates only Circuit I and plugs into a standard 120-v/20-Amp outlet. The maximum quantity of duplexes that Nevers ships per circuit is 8.

Multi Circuit Hardwire - Activates all four circuits and has a 6' Liquid Tight conduit. This must be installed by a certified electrician.

The Multi Circuit Hardwire electrical system is an 8 wire 4 circuit modular system. It is listed as a manufacturers wiring

system under UL standard 183. The system can be hard-wired in both single and three phase configurations 120/240V and 120/208V respectively. Circuit I, II, and III share a neutral and a ground. Circuit IV is isolated and dedicated. Always check local codes for restrictions.

Delivery of the electrical power from the floor to the table is provided directly through any base leg or through the panel base.

While it is not required of you to specify the number of duplexes for each circuit, you may certainly do so if the installation requires this. Simply list on the order the quantity of duplexes required for Circuits I, II and III and the quantity of duplexes required for dedicated isolated Circuit IV. If you have any questions regarding Power/Voice/Data, please call our customer service department at 1.800.242.2443.

See the following pages for the base location guide and for the quantity of electrical outlets and voice/data outlets that are supplied per table.

Eventi Collection Features and Benefits

INTRODUCTION

The Power to Change. That is the reason Nevers created the Eventi Collection. Our mutual customers' new requirements today are for Meeting, Conference and Training rooms that are designed for productivity. That means—multipurpose, cross functional, movable and equipped to handle today's technology for power/voice/data and audio visual. The Eventi Collection is designed to accommodate all the functions that are required of today's productive meeting rooms.

Eventi by Nevers also has The Power to Change the way a room is perceived. Every business has it's own culture and requirements for the perception it wishes to project, both internally and externally. With the Eventi Collection, design and budget needn't be conflicting interests in Meeting Room planning. The multi-tiered Eventi line makes beautiful, functional and cohesive design possible throughout the workplace, with varying degrees of design emphasis made where necessary. One line of furniture, with levels that fit every need and use—from Corporate functions, to Executive presentation, to General conference to Small Meeting room—Eventi covers it all.

Eventi by Nevers was created to be customized. This allows you The Power to Change sizes, color, shapes and materials—and so does Eventi. With Eventi you can choose from a wide range of materials and surfaces. Eventi's unique design was created for unlimited customization options. Choose from wood, glass, metal, stone, leather and more—offering an incredible array of design versatility.

FEATURES & BENEFITS

Eventi Articulating Tables

Eventi Articulating Tables are designed to transform any room for any function. One end of the table is fixed. The side extensions are attached to this end with a pivot and the bases are on casters. The hidden metal subframe and pivot allow the side extensions to easily roll and arc outward into the extended position. The Articulating Table transforms from solid table, to open presentation space, to multimedia viewing. A room with an Eventi Articulating table is not simply a boardroom, a conference room, a meeting room or a training room. It can be, and is—any or all—of those rooms.

Eventi Modular Tables

Eventi Modular Tables are a semi-fixed grouping of tables designed to accommodate larger meetings where the primary focus is board members, teams or round-table type discussions. Though the Modular Tables are designed primarily for semi-fixed applications, they can be easily reconfigured occasionally for any function such as executive training, video conferencing, multimedia viewing. Eventi Modular Tables are also easily specified for other primary configurations. The configurations of Triangle, U-Shape and Diamond as shown on the pricing pages are not meant to limit your design imagination, but rather to be used as a starting point.

Eventi Conference Tables

Eventi Conference Tables exclusive modular design was created not only to make a progressive statement but to also compliment today's architectural designs and the materials being used. The segmented design of the Eventi Conference Table tops allows unlimited combinations of wood, metal, glass, stone and more. The plateau is part of the edge detail, and because it is finished in colorcoat, adds an additional design element on its own. The hidden metal chassis is steel tubing that connects the segmented tops and the bases together into a complete, solid table. Combine this with the multiple base choices and the various shapes and sizes, and you have the flexibility to complement and enhance any of today's building designs.

Eventi Due' Tables

With the addition of Eventi Due' Tables, design and budget are no longer conflicting interests in Meeting Room planning. All the basic design elements that define Eventi have been carried into the Due' Tables—multiple bases, edge details, wood and color choices. The functional elements have also been maintained—executive conference, video conference, multi media presentation, training. Eventi Due' Tables are designed with standard (non-segmented) table tops. Optional design details of plateau and inlay allow you to maintain cohesive design throughout the workplace. The Small Meeting Room Tables use the same base components scaled to a T-leg configuration. Eventi and Eventi Due'—one line of furniture with levels that fit every need and use.

Eventi Visual Products & Casegoods

Visual Products and Casegoods complete the productivity requirements of today's Meeting, Conference, and Training rooms. From the seemingly insignificant stocking of proper meeting room supplies, to interactive writing boards, to full-wall multimedia presentation cabinets, Eventi handles all the details that create a dynamic, productive meeting room environment.

MEETING CUSTOMER REQUIREMENTS (MCR)

As the complexities of Meeting Rooms grow and the lines between private workspace and meeting space continue to blur, the importance of determining customer requirements prior to specifying meeting room furnishings cannot be overstated. For over 25 years Nevers business has been only in conference and meeting rooms—and furnishing those rooms to meet the customers requirements for productivity. No one can do this better than Nevers. Other manufacturers give you hundreds of pages of product details to sort through, that's fine, we have them too. But because of our years of experience, we are also able to help you at a much higher level, that is, supplying you with the proper tools for clearly defining today's more complex requirements for meeting rooms. Having clearly defined, written customer requirements allows you to write knowledgeable, safe specifications using product solutions that are best for the customer.

You can be assured that when specifying & ordering Nevers' products, we will work closely with all project team members to make sure our mutual customers receive the best in customer service and that all of their requirements will be met.

Build Your Own Eventi Conference Tables

Build Your Own EVENTI™ Quote Request

“Build Your Own EventiT[™]” was created for your unique design specifications. Please specify the following information regarding table top, power/data, and bases. **Material and color choices can be found on page 3.** To assist in choosing your options, copy both pages, fill out the form and fax it to our Customer Service Department at 800.258.5591 for a 24 hour quote response.

** Each Technology Center has capacity for up to 6 voice, data or av connectors.

***Two Circuits required.

Pre-Configured Meeting Link™ is an easy to specify system of Technology Centers preconfigured to a specific table size. Each Technology Center houses two Electrical Outlets and three Universal Data Plates. The data plates are easily removed to allow for insertion of up to 6 voice, data or AV connectors per Technology Center. The channel also has a Kensington lock attachment capability.

The Technology Centers are mounted under the table top and are ganged to allow for a single source in-feed of the electrical, voice, data and AV connections. The electrical in-feed may be specified as either hard wired or soft cord plug in.

Technology Centers for Customizing Meeting Link™ Capacities

12"l x 6"w

Please note - location drawing required*

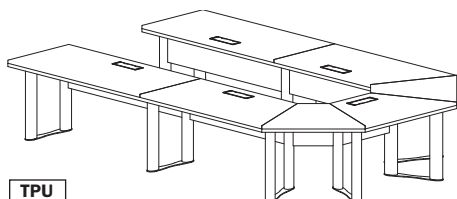

Model Number	Voice Data and AV Port Capacity	Electrical Outlets	Price	How To Order
R/PV5/AA	6	2	\$443	See above

*When ordering Customized Meeting Link™, a drawing of the table top with the location of each Technology Center is required. If ordering multiple Technology Centers for 1 table, specify on drawing if ganging is required, maximum 12 per circuit. For additional assistance in specifying/ordering Technology Centers, please contact customer service at 800.242.2443.

How To Order

Please Specify:

1. Model Number

2. Wood Species and color

See Eventi Color Index: Page 7

3. Plateau Colorcoat color

Silver Fog - C1
Shadow Grey - C2

4. Metal color for Base

Platinum - M1
Shadow Grey - M2

5. Optional Insert

Colorcoat Insert - R1 Std - NC
Color Matches Plateau Color
Glass Insert - G1 \$201
Stone insert - S1 \$559
Specify Stone Color - page 7
Faux Leather Insert - L1 \$504
Specify Faux Leather Color - page 7

6. Microphone Cutout

No cutouts - T0
Microphone Cutouts - T1
Per cutout \$92 ea
Location must be approved by Nevers

7. Optional* Power/Voice/Data

Specify PVD - PX
a. Specify Power Infeed Type
Single Circuit Plug In - P1
Four (4) Circuit Hardwire - P2
City of Chicago - P3
b. If required, specify quantity of duplexes on isolated Circuit IV

Executive Conference Tables

Eventi Dué Tables

With the addition of Eventi Dué Tables, design and budget are no longer conflicting interests in Meeting Room planning. All the basic design elements that define Eventi have been carried into the Dué Tables—multiple bases, edge details, wood and color choices. The functional elements have also been maintained—executive conference, video conference, multi media presentation, training. Eventi Dué Tables are designed with standard (non-segmented) table tops. Optional design details of plateau and inlay allow you to maintain cohesive design throughout the workplace. The Small Meeting Room Tables use the same base components scaled to a T-leg configuration. Eventi and Eventi Dué—one line of furniture with levels that fit every need and use.

18'	R/PV5/07	14	8	16	3102	
20'	R/PV5/09	16	8	16	3988	

** Each Technology Center has capacity for up to 6 voice, data or av connectors.

Pre-Configured Meeting Link™ is an easy to specify system of Technology Centers preconfigured to a specific table size. Each Technology Center houses two Electrical Outlets and three Universal Data Plates. The data plates are easily removed to allow for insertion of up to 6 voice, data or AV connectors per Technology Center. The channel also has a Kensington lock attachment capability.

The Technology Centers are mounted under the table top and are ganged to allow for a single source in-feed of the electrical, voice, data and av connections. The electrical in-feed may be specified as either hard wired or soft cord plug in.

Technology Centers for Customizing Meeting Link™ Capacities

12"l x 6"w

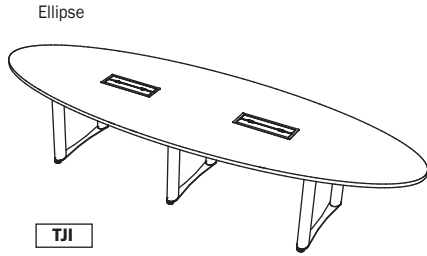

Please note – location drawing required*

Model Number	Voice Data and AV Port Capacity	Electrical Outlets	Price	How To Order
R/PV5/AA	6	2	\$443	See above

*When ordering Customized Meeting Link™, a drawing of the table top with the location of each Technology Center is required. If ordering multiple Technology Centers for 1 table, specify on drawing if ganging is required, maximum 12 per circuit. For additional assistance in specifying/ordering Technology Centers, please contact customer service at 800.242.2443.

Visual Board and Conference Room Casegoods General Features

Visual Boards

Eventi Visual Board veneer doors are 3-ply construction and are balanced on back to minimize warping and to balance natural stresses. Face veneers are Nevers Custom "A" grade and are laid up to Nevers custom specifications for book match and center match. This is done to assure design balance.

Doors are framed with 3/16" x 1-1/4" solid hardwood in a Nevers custom hardwood specification. This creates a finished design look inside the doors with a wood frame that trims the fabric tackboard panels. A fully enclosed, pull down projection screen is included as standard with all Eventi Visual Boards.

PORCELAIN ON STEEL WRITING SURFACES

The writing surface on Eventi Visual Boards is the highest performing surface that is available. It is porcelain on steel and is the only surface that is guaranteed to not chip, ghost or scratch for the life of the product. This writing surface can also be used occasionally as a projection surface with a minimum of glare or 'hot spots.' This allows for notes or markups to be done on projected images.

CLEANING

The only requirement for maintaining the porcelain writing surface is to periodically clean with Expo White Board cleaner. If at any time, you notice any ghosting, it is time to clean the surface. Replace the felt erasers when they no longer erase cleanly or you notice excess residue from the dry-erase pens.

WallWorks with Nevers' Extreme™

Eventi WallWorks introduces the new Nevers Extreme writing panels. Extreme writing panels combine the performance of porcelain on steel with an extremely lightweight core. This is the lightest square foot weight porcelain panel available and is available only from Nevers. All panels are reversible and have a fabric covered tackboard on the reverse side. Under normal conditions and use, Extreme porcelain writing panels are guaranteed to not chip, scratch or ghost for the life of the product.

PowerBoard

Nevers PowerBoard operates in three functional modes.

STANDARD/COPY MODE

In Standard/Copy mode, PowerBoard functions just like any Nevers standard dry erase white board. Write, draw, brainstorm, but now, simply touch a button and PowerBoard instantly prints a copy to your printer. It's that simple! And all within one self contained unit, which means no peripheral PC or software required!

PC MODE

In PC mode, PowerBoard functions just as it does in Standard/Copy mode, but now, simply touch a button and PowerBoard instantly saves a copy to your PC, without any interruption to the meeting. It's that simple! When the meeting is done, print or email copies directly to the attendees!

INTERACTIVE MODE

In Interactive mode, PowerBoard now becomes completely integrated. By projecting applications through your LCD (budgets, spreadsheets, CAD drawings, Power Point slides) onto PowerBoard you can; operate the application directly on PowerBoard, edit, annotate, access the web and conduct meetings with remote attendees. It's that simple! This allows everyone to focus on the meeting while PowerBoard takes the notes, which you can print or email later.

Units ship complete with 4 writing pens, eraser and all hardware necessary for mounting. Includes software and drivers for Windows 95/98/NT/2000/ME. Hardware interface – RS-232 and Universal Serial Bus (USB) standard.

Conference Room Casegoods

Eventi credenzas and other casegoods veneer panels are 3-ply construction and are balanced on back to minimize warping and to balance natural stresses. Face veneers are Nevers Custom "A" grade and are laid up to Nevers custom specifications for book match and center match. This is done to assure design balance.

OPTIONAL GLASS TOPS

Glass tops are 1 cm (3/8") tempered glass and are etched on the bottom side.

OPTIONAL STONE TOPS

Stone tops are 2 cm (3/4") Dupont Zodiak with a 93% quartz content.

MediaWall

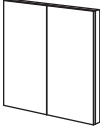

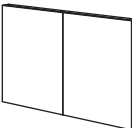

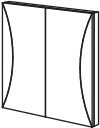

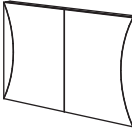

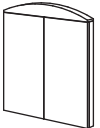

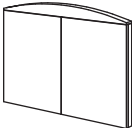

Eventi casegoods are engineered using cabinets with fixed dimensions. Single wide cabinets have a nominal inside dimension of 15-1/2" and a nominal outside dimension of 17". Double wide cabinets are nominal 32-1/2" inside and 34" outside. The vertical panels then mount on each side to create shelving units that are nominal inside of either 17" or 34".

Using pre-engineered components allows you the maximum flexibility to specify any configuration while maintaining the design balance of the finished piece. This also allows for custom configurations without the time and costs usually associated with custom product or millwork.

GLASS DOORS

Glass doors are 5mm tempered glass and are etched on the back. Door frame is aluminum.

Visual Boards

 164" x 3" x 48"	E/WLW/16448	5510	5683	6359

Standard Features

Eventi WallWorks is designed to complement any level of conference room. The mounting track is positioned behind the valances so there is no exposed track between them. When the panels are removed, the primary visual that remains on the wall is the decorative wood or stone valance. Ships standard with Shadow fabric color.

Custom Configurations:

Please call customer service to discuss any specific sizes or configurations that you may require. In most cases we can respond immediately with email illustrations and pricing.

Wood and ColorCoat – Material Combinations:

Standard material combination is colorcoat with wood door/drawer faces, wood mounting plate for plasma monitor and wood exposed backs.

Backs of enclosed cabinets are black. Shelves are colorcoat as standard. See options for wood and glass shelves. Glass Doors are etched on back and metal framed. Metal frame color in Platinum only.
