General Specifications

Wood Veneers

Nevers® products are manufactured primarily of Plain Sliced Mahogany, Walnut, White Oak, Cherry, Ash and Maple. Other woods may be specified. Please contact Customer Service for price and availability. Veneer panels are laid up with plain sliced faces and are balanced on back to minimize warping and balance stresses.

Wood Surface Cleaning

Wood furniture should be cleaned with a damp, soft cloth, wiping in the direction of the wood grain. Wood surface should then be dried with a dry, soft cloth. Monthly, wood surfaces should be cleaned with a soft cloth using a quality wood cleaner. Following cleaners directions, slightly dampen soft cloth and wipe in direction of wood grain. Dry the wood surface with a dry, soft cloth. Ammonia or any type of oil should be avoided.

Standard Wood Finishes

Nevers' standard finish is a multi-step process involving dyes, stain, sealer, toner and lacquer. For added protection and durability, the final top coat on all table tops is catalyzed lacquer. All of the finishes have been formulated for maximum clarity to enhance the natural characteristics of each particular wood species. Standard finish is open pore. Semi-filled and filled finishes require an upcharge and may extend the lead time. Please contact Customer Service for price and delivery date.

For other wood species, contact Customer Service for special pricing and availability.

Custom Wood Stains and Finishes

or finishes. Virtually any wood finish or color sample can be matched to your specifications. A finish sample or stain sample is required from the customer before the process of matching approval can begin. The upcharge for custom finishes varies with the type of finish and also with the quantity ordered.

Costs are applicable per # of samples requested. Costs are applicable per any changes resulting in additional samples. Costs based on ground shipping only from Nevers. Customer may opt for faster shipping at own cost. Costs to customer are refundable upon receipt of a project PO, payable as a discount on final order.

Note: COLOR VARIATION WILL OCCUR IN THE GRAIN OF ALL WOOD SPECIES.

This is an inherent characteristic caused by the annual growth rings found in all hardwoods and the manner in which the boards and veneers are cut across these growth rings. In some species, this color variation is very subtle. In other species this color variation is obvious and at times radical.

The process of finishing hardwood veneers determines whether these variations are enhanced or subdued. Natural finishes will show color variations in the grain and enhance the beauty of the wood to its fullest extent. Other stains and finishes tend to blend in these variations to some extent dependent upon the depth of color and the particular method of application.
