Case Study: Modular Tables

Project:

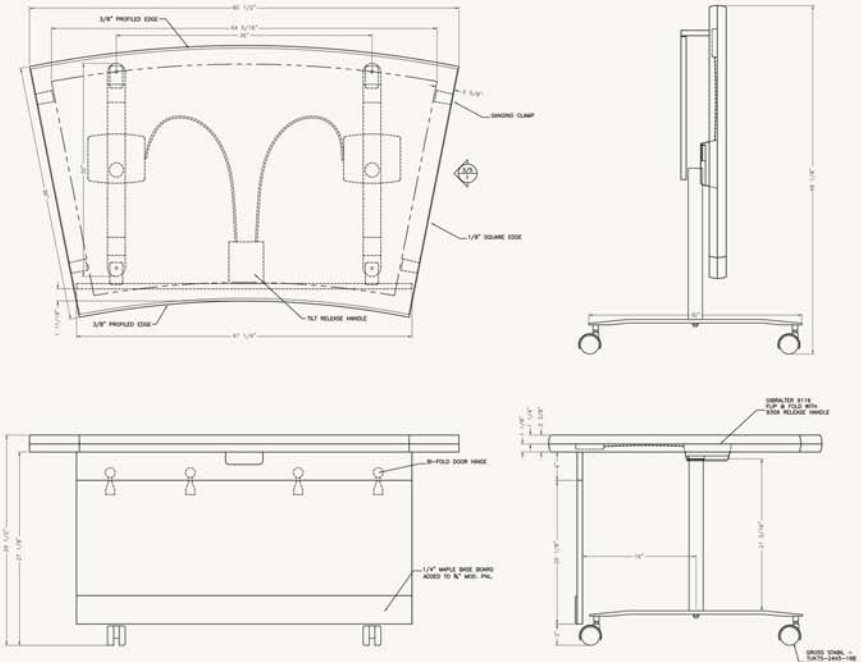

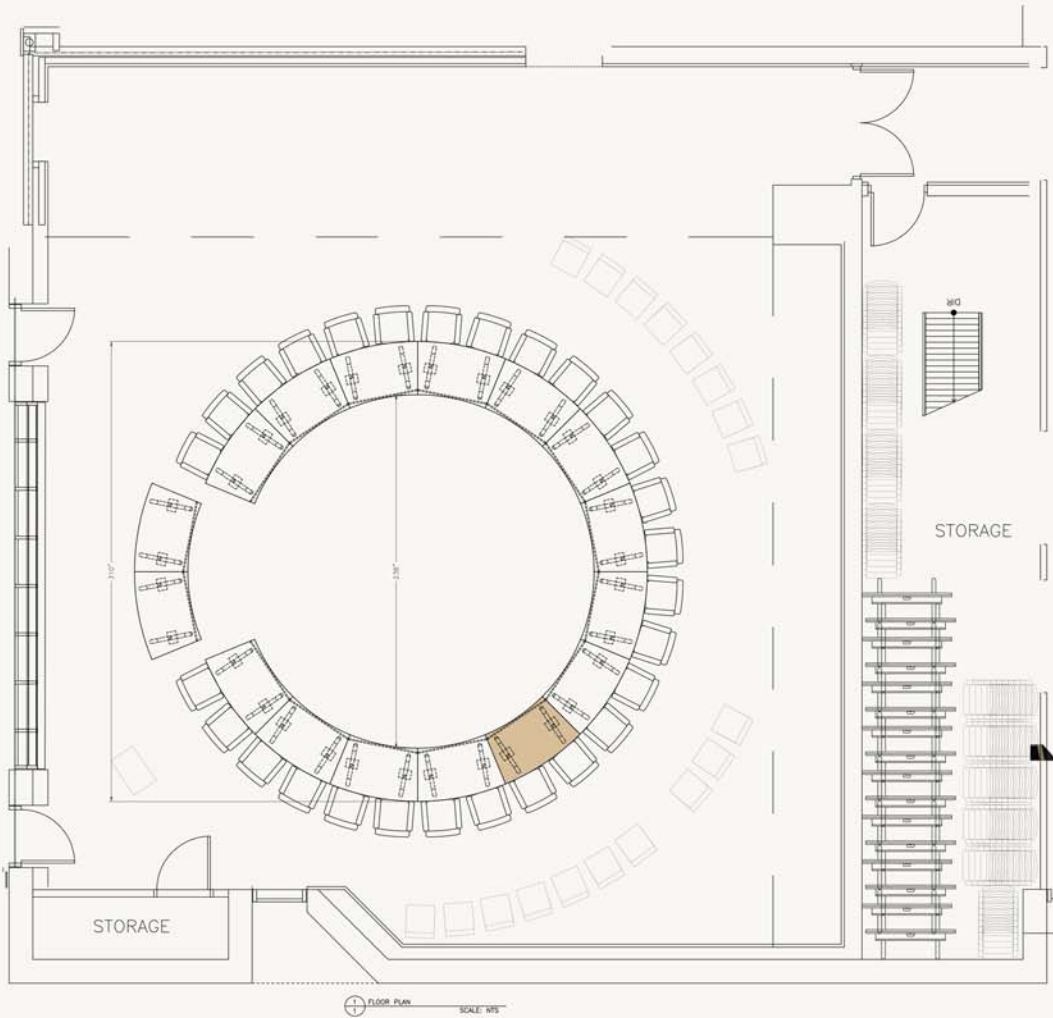

Client required a large forum-type circular table arrangement for a yearly board meeting in an otherwise auditorium space. Table components had to be able to be separated, collapsed and easily stored.

Solution:

- 16 individual tables that form a 310" diameter table.
- Natural Maple Veneer
- Metal bases with flip mechanism and hinged modesty panels
- All 16 tables can be stored in an 11' x 11' room when the space is converted back into auditorium seating
