

Nevers Specialized Finishes Services:

Customer-Provided Finish Samples - Compatibilities and Types

Sample Size to Provide Nevers

We will need a flat sample piece from you to be shipped to us. *The size of your sample should be at least 3" x 3"* for a good comparison. The larger the sample, the better.

SPF Compatibility with Sample Types

We will assess the **compatibility** of the material you will provide and advise you of any concerns, meaning the ease in which we can provide a specialized finish match. Some materials are much more compatible than others. Here's a general overview:

Sample material types are graded on their **percent compatibility** for Nevers SPF projects.

BEST: A wood veneer sample similar to Nevers' current standard **species** of oak, walnut, cherry, mahogany, or maple has the highest compatibility.

FAIR: Exotic wood species, laminates, reconstituted wood, and other wood-like materials may affect material costs as our standard species may not apply and there may be material sourcing logistics.

CHALLENGING: Pantone colors, wall covering paint samples, complex laminates, and other materials with textures or incompatible natural wood coloration needs may also incur further charges.

A Word About Wood Veneer Slices (Cuts)

Along with our standard wood veneer species, Nevers utilizes flitches of plain sliced (flat cut), quartered sliced (quarter cut), and rift cut veneers in our products. If you need something else, please contact us for availability and an estimate.

Nevers Specialized Finish Expectations

Nevers will attempt to provide a customized finish to fit your needs on the very first try. We take that to mean what we provide will be **within a range of one or two shades** of near duplication.

It's important you recognize that creating specialized finishes is both an art and a science. For more complex finish projects, we may need to make an initial try based on the information provided, and a further, more precise, attempt. This may be due to the wide variability of natural wood veneers or how compatible the sample we are comparing may be.

Ready to Proceed?

If you haven't submitted information to us about an SPF project to us, you can do so on our website at www.nevers.com/spf/. This will alert us to your intentions and will help to provide us with all the information we will need.

SAMPLE SHIPMENT INFORMATION: Once you've contacted us and are ready to proceed with forwarding your sample, please send it to:

SPF Services
Nevers Industries
6845 Wedgwood Court North
Maple Grove, MN 55311
