

WOOD VENEER 101

A NEVERS CEU

Wood Veneer 101 seeks to provide a better understanding of natural wood veneer used in contract furniture. Topics include anatomy of a log, grading process, process of creating veneer, cut types, layup, construction, common American wood species, reconstituted veneer and how it is made, FSC, finishing techniques and care and cleaning.

Intended Audience: Designers, architects, commercial furniture dealers and specifiers, facilities managers and specifiers for commercial, government and hospitality applications. Also applicable to students and beginning commercial interior designers who are not familiar with wood veneer, common hardwood species and finishing techniques for commercial furniture.

Credits: 1 credit hour IDCEC CEU/HSW, AIA LU/HSW, GCBI CEs.
